HEWLETT-PACKARD COMPANY			KENDALL, CHUCK O	
Intellectual Property Administration			ART UNIT	PAPER NUMBER
P.O. Box 272400				
Fort Collins, CO 80527-2400			2192	

DATE MAILED: 08/25/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	09/810,174	MCCOY ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Chuck O. Kendall	2192	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 06 July 2006.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1, 2, 5 – 8, 10 – 15 & 17 – 31 is/are pending in the application.
  - 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1, 2, 5 – 8, 10 – 15 & 17 – 31 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 15 March 2001 is/are: a) accepted or b) objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) All    b) Some \* c) None of:
    1. Certified copies of the priority documents have been received.
    2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

1. This action is in response to Applicant's amendment filed 07/06/06.
2. Claims 1, 2, 5 – 8,10 – 15 & 17 – 31 and have been amended and are pending.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 2, 5 – 8,10 – 15,17 – 24 & 26 – 29 rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. USPN 6,067,582 in view of Puhl et al. USPN 6,223,291 B1.

Regarding claim 1, Smith discloses a method of installing components of a software product on a first network server device coupled to a network the components of the software product providing the first network server device the capability to provide a first service to a plurality of server-assisted network devices coupled to the network, the method comprising:

automatically detecting with the first network server device a first set of server-assisted network devices coupled to the network that are eligible to use the first service (3:20 – 25, see confirms acceptance and verifying for eligible);

automatically transmitting device information based on the detected server-assisted network devices to a second network server device (3:23 – 25, see identification information);

receiving license information from the second network server device based on the transmitted device information (3:20 – 23);

automatically determining a cost and a number licenses needed (9:32 – 45, see purchasing predetermined number of licenses, also for cost see 9:1 – 5 for billing information);

automatically purchasing at least a portion of the licenses (9:23 – 25, and 45 – 50)

storing configuration information associated with the particular license purchased (7:1 – 15, see particular see configuration and information specific to the remote computer);

automatically installing components of the software product on the first network server device and configuring the server based on the configuration information (7:35 – 40);

displaying an information screen identifying the number of server-assisted network devices in the first set; and automatically installing components of the software product on the first network server device (FIG. 2, 52).

Smith doesn't explicitly disclose displaying cost information based on the number of server-assisted network devices in the first set, the cost information representing the cost to install components of the software product and provide the first service to the server-assisted network devices in the first set; and automatically installing firmware on each server-assisted network device in the first set to support the first service.

However, Puhl in an analogous art and similar configuration discloses maintaining a list of wireless devices and license information associated with them (1:35 – 40) as well as, disclosing bill based on added items on the wireless devices 19:1 – 15 and delivering the item (downloading) 19:22 – 27. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine Smith and Puhl because, it would make the system more manageable.

Regarding claim 2, the method of claim 1, and further comprising:  
automatically installing components of the software product on each server-assisted network device in the first set (4:52 – 54)

Regarding claim 5, the method of claim 1, and further comprising:  
receiving payment information identifying a means of payment for use of the software product (17:15 – 25, see billing information).

Regarding claim 6, the method of claim 5, and further comprising:  
automatically transmitting the payment information to the second network server device ( 7:15 – 17, see billing information is transferred back to server module).

Regarding claim 7, the method of claim 1, storing at least a portion of the received license information on the first network server device (9: 52 – 55).

Regarding claim 8, see rationale as previously discussed above in claim 7, which claims similarly to above in reference to storing licensing information.

Regarding claim 10, the method of claim 1, wherein each server-assisted network device in the first set is one of a personal computer, printer, scanner, and a digital sender device (2:43 – 45, for personal computer, see plurality of attached computer clients).

Regarding claim 11, the method of claim 1, and further comprising: receiving device selection information from a user identifying server-assisted network devices in the first set that are to be provided the first service (7:5 – 15).

Regarding claim 12, the method of claim 11, and further comprising: automatically installing components of the software product on each identified server-assisted network device (7:37 - 40).

Regarding claim 13, which discloses similar limitations as claim 1, see rationale as previously discussed above

Regarding claim 14, which is the product version of claim 1, see rationale as previously discussed above.

Regarding claim 15, which is the product version of claim 2, see rationale as previously discussed above.

Regarding claim 17, which is the computer readable medium version of claim 1, see rationale as previously discussed above.

Regarding claim 18, which is the computer readable medium version of claim 2, see rationale as previously discussed above.

Regarding claim 19, which is the computer readable medium version of claim 3, see rationale as previously discussed above.

Regarding claim 20, which is the computer readable medium version of claim 4, see rationale as previously discussed above.

Regarding claim 21, which is the computer readable medium version of claim 5, see rationale as previously discussed above.

Regarding claim 22, which is the computer readable medium version of claim 6, see rationale as previously discussed above.

Regarding claim 23, which is the computer readable medium version of claim 7, see rationale as previously discussed above.

Regarding claim 24, which is the computer readable medium version of claim 8, see rationale as previously discussed above.

Regarding claim 26, which is the computer readable medium version of claim 10, see rationale as previously discussed above.

Regarding claim 27, which is the computer readable medium version of claim 11, see rationale as previously discussed above.

Regarding claim 28, which is the computer readable medium version of claim 12, see rationale as previously discussed above.

Regarding claim 29, which is the computer readable medium version of claim 13, see rationale as previously discussed above.

5. Claims 9,16 & 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. USPN 6,067,582 in view of Puhl et al. USPN 6,223,291 B1 as applied in claim 1, 14, and 17 and further in view of Barrett et al. USPN 5,647,056.

Regarding claims 9 & 16, Smith as modified disclose all the claimed limitations as applied in claims 1 & 14. The combination of Smith and Puhl does not explicitly disclose automatically installing firmware on each server-assisted network device in the first set to support the first service.

However, Barrett does disclose loading firmware in a similar configuration (FIG.24, S2403), for multiple terminals. Therefore it would have been obvious to one of ordinary skill in the art at the time then invention was made to combine Smith and Puhl, with Barrett because, it would enable firmware to be distributed and installed from a remote location.

Regarding claim 25, which is the computer readable medium version of claim 9, see rationale as previously discussed above.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1, 2, 5 – 8,10 – 15 & 17 – 31 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuck Kendall whose telephone number is 571-272-3698. The examiner can normally be reached on 10:00 am - 6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tuan Q. Dam can be reached on 571-272-3695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Ck.
